

BLANKNEST

Blank Nesting Software

Optimal Blank Nesting Layout

- Automatically nests for best material utilization for one-up and two-up layouts
- Quickly and accurately estimates your material requirements
- Evaluates multiple nesting scenarios quickly
- Accurately determines total cost per blank

BLANKNEST determines optimal material usage through geometric nesting of blanks

BLANKNEST

Blank Nesting Software

Optimal Blank Nesting Layouts

BLANKNEST is powerful nesting software specifically designed for nesting sheet metal blanks on coils. It automatically calculates the best nesting layout to optimize material utilization based on coil width and pitch constraints.

Nest in both one-up and two-up layouts to optimize material utilization

Blanknest will optimize layouts with up to two different blanks

FEATURES

- Imports blank shape from IGES, DXF file types and other FTI software.
- Produces fully optimized nesting layouts for both one-up and two up nesting configurations.
- Nests different blank shapes and left and right-hand blanks in the same layout.
- Constrains pitch, coil width, and blank rotation (grain direction) to ensure layout is compatible with available equipment and product requirements.
- Calculates accurate cost per blank based on supplied input and material utilization.

ABOUT FORMING TECHNOLOGIES

Forming Technologies Incorporated (FTI) is the world's leading developer of computer aided engineering software for design and simulation of sheet metal forming. FTI has developed a suite of products to analyze product formability, die design, and process feasibility. For the past 15 years, FTI has provided the automotive OEM, Tier 1, Tier 2, Tier 3, aerospace, and appliance industries with innovative software and training solutions designed to reduce development time and material costs. These solutions have resulted in millions of dollars of savings for our customers. FTI and its global network of partners provide sales and technical support to customers in more than 30 countries.
